Facial Recognition Identification System

- ✓ **Reliability** – Immediately recognizes the identity of the pick-up individuals
- ✓ **Accuracy** – Matches students with authorized pick-up individuals registered in the database
- ✓ **Traceability** – Detail records of pick-up events (when and by whom)
- ✓ **Ease** – No more paper cards around
- ✓ **Efficiency** – Streamlines the pick-up process

Student Pick-up Process

1

Step 1:
When a student leaves the school, the student will first swipe his/her ID card on the identification system.

2

Step 2:
The pick-up person is required to stand in front of the system for facial recognition before he/she leaves the school premises with the student.

3

MATCH!

Step 3:
The system will immediately identify the person. Once it is confirmed that he/she is an authorized individual, the system will show a “green light” and record the pick-up event.

RFID Key Management System

Electronic Security, Access Control and CCTV Security System
