Cash Management

Guardforce has been Asia's leader in cash management services since 1977. The company deploys the highly-trained staff and a fleet of specialised armoured transport vehicles to manage and transport cash safely and reliably for clients including financial institutions, retail chains and government departments. Our secure and comprehensive services benefit clients by improving staff efficiency, reducing risks and lowering insurance fees.

Cash & Valuable Collection & Delivery

Guardforce provides end-to-end collection and delivery services of cash and valuables. With our professionally-trained team and specialised armoured vehicles, we provide timely and secure services taking care of your assets and valuables.

ATM Management

Guardforce's ATM logistical services present a secure and cost-effective solution for financial institutions, enabling clients to focus on their core business competencies. Our integrated services include cash replenishment, cheque collection and delivery, deposit envelop collection and processing, alarm response and emergency maintenance services.

Cash Processing

Operate by experienced and vetted staff in a highly secure Cash Processing Centre under 7/24-monitoring, cash is collected from customers' retail outlets and then sorted, verified and promptly deposited into clients' specified accounts. Customised reports tailored to specific needs are made available upon request.

Wrapped Coins Supply & Processing

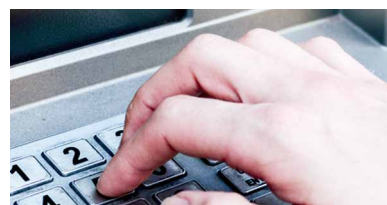

Guardforce's coin supply and processing services supply retail outlets with coins to meet daily operational needs, and process received coins for re-distribution or deposit. Advanced processing technology allows us to count and verify high volumes of coins accurately, safely and quickly, allowing your staff to spend more time on customers and daily operations.

Sub-treasury Management

Our sub-treasury services assist banks in managing cash forecasting, collecting and processing, as well as supplying emergency cash. All banknotes processing meets the deposit standards of the note-issuing banks, and all cash and valuables are stored in bank-vault-standard secured strong rooms.

Cash Deposit Management Solution

An automated solution integrating technology and our core service helps alleviate staff workload, improve cash handling and reconciliation processes, and minimize operational risks. From verifying cash input and safely storing cash through the Cash Deposit Machine to depositing cash into customer's bank account by Guardforce's cash-in-transit professionals, we provide an end-to-end solution minimizing cash handling risks for retailers.

Physical Security

Guardforce's industry-leading physical security services protect clients' valuable assets, data tape backups and other belongings in our secure, purpose-built storage facilities. Through tailored and specialised services, we ensure your valuables are delivered to you securely and on time.

Guardforce Mobile Safe Service

Guardforce pioneers Mobile Safe Service, offering storage in personal safety box with door-to-door secure dispatch to your specified location with flexible delivery schedule, allowing you to access your valuables in complete privacy and convenience.

Secure Storage

Guardforce offers security storage in our highly secured, 7/24 monitored, bank-vault standard strong room facilities. As a leader in total security solutions, Guardforce has set the benchmark for secure storage and distribution of customers' valuables including data tapes, cash coupons, confidential documents etc.

Security Courier

Under the Guardforce Security Courier Service, our disciplined, professional and police-screened team and GPS-equipped vehicle fleet will deliver critical documents and data – including share certificates, cheques, documents and data tapes – according to your specified deadlines.

International and Overseas Shipment

Guardforce International specialises in risk management for international transport of valuable commodities, including banknotes, bullion, credit cards, gemstones and jewellery, with flexible comprehensive insurance cover options. Guardforce also provides cross-border, full-liability security transport services from Hong Kong to Macau and Shenzhen.

Pick and Pack

Guardforce's Pick and Pack service takes care of collecting, packing, storage, distribution and inventory management of your phone cards, gift certificates, cash coupons and other stored-value cards.

Left Luggage

Guardforce is experienced in working with international airport and airport express stations to provide luggage safekeeping services. Our professional teams, access-controlled storage facilities and strict operational procedures ensure the highest convenience in securing, storing and returning luggage.

Electronic Security

Leverage Guardforce's security expertise and state-of-the-art electronic devices to optimise your company's security and reduce your exposure to thefts or burglary. You can also be assured of our one-stop after-sale full support and timely maintenance service.

In addition, we deploy the latest technology to integrate surveillance cameras with various operations systems such as access control, POS, people counting, facial recognition and more. The all-in-one solution that requires no extra installation also offers multi-task functions to add value to your business.

Alarm System

Guardforce alarm systems provide early warning of criminal activities for commercial, residential and government establishments. Our state-of-the-art security systems provide peace of mind and extra layers of security for customers' assets and valuables.

CCTV

From simple retail and warehouse monitoring solutions to full-feature commercial CCTV systems, our professional consultants and technicians assist customers in designing, installing and maintaining the most appropriate solutions for their security needs.

Access Control

Applying a wide range of smart-card and biometrics technologies, Guardforce provides and installs systems to control access in and out of secure and sensitive areas.

Service & Maintenance

Regular service and maintenance of security systems performed by our trained and experienced staff ensure customers' systems are running at optimal effectiveness and peak efficiency.

Security Products

Guardforce offers technologically advanced security products as part of our total customised security solutions, providing solid hardware to fortify our expertly designed electronic security systems. Security products include safes, locks, vault doors, modular vaults, safe deposit locker systems, fire-resistant cabinets, bullet-resistant and impact-resistant glass etc.

Integrated Security System

Combining alarm systems, access control and monitoring systems, and state-of-the-art technology, Guardforce's Integrated Security Solutions provide all-round security customised to customers' specific business and operational requirements.

Security Personnel

Deploy our professionally trained guards to better protect your properties and people. Our security guards have undergone stringent background checks and meticulous vetting procedures prior to employment, and have undertaken intensive training that gear them up for specific security tasks and service projects to ensure they meet customers' specific needs for guard service. Our guards' professional and presentable appearance will be consistent with your corporate image.

Manned Guarding

Our well-trained and experienced security guards are responsible for the security and safety of people and properties, and we provide services to a wide range of sectors including both commercial and residential. Flexible packages are available to cater to long-term or ad hoc needs.

Event Security and Guarding

We offer a complete security solution for any occasions, from large-scale events to private functions. As a leading security services provider, Guardforce has the manpower, experience and capabilities to facilitate the smooth operation and safety of events. We provide support on event security planning, crowd and security control and escort. Our guards can be in uniform or plain-clothes to suit different occasions.

Alarm Response and Key Holding

When security alarm systems are triggered, Guardforce's alarm response team will swing into action. They will assess the situation and direct security personnel to the site if required. With our key holding services, Guardforce will hold the keys to your business premises or other specified facilities. Upon receiving your authorisation, our security personnel will access the property on your behalf to identify the cause of the alarm and, if necessary, alert relevant authorities to the situation.

Mobile Patrol

Guardforce provides a cost-efficient solution offering clients the flexibility of having guard service at their desired level, time frame and frequency. Consultation and evaluation will be carried out prior to implementing the service to ensure the all risks are well covered.

Innovative Solutions

Integrating cutting-edge technology expertise with our diverse security services, we offer our customers innovative solutions to stay ahead in the constantly changing business environment being reshaped by evolving technology. Our solutions not only enhance security, but most importantly add value for our customers. Our solutions, purpose-designed for the commercial sector, the care sector or smart city development, will generate long-term benefits for the society.

Solutions for Elderly Care Facilities, Rehab Centres and Schools

We make use of technology such as facial recognition, surveillance and thermal cameras to develop solutions that will help caregivers monitor their facility environment, make speedy response to urgent situations, and streamline operations by reducing the manual work load.

- Our pioneering **smart anti-wandering** solution uses **facial recognition** technology to monitor the exit points of a care facility. The solution is non-invasive and automated. Caregivers get an immediate alert if a client is about to wander off the facility.
- The anti-wandering solution offers a spin-off function for automatic **attendance tracking** by facial recognition. This is a handy tool for day-care centres and sheltered workshops, which are required to report attendance to relevant authorities.
- Facial recognition can be combined with thermal cameras to develop a **body temperature detection solution**. This is highly useful for schools, in particular kindergartens, where preemptive actions against preventing the spread of communicable diseases will prove beneficial for the wellbeing of students.

Solutions for Smart Cities

Our smart solutions help make our city more connected. By integrating information and communications technology (ICT) with physical devices, we connect various aspects of a city's operation, enhance security, save costs and improve the environment.

- **Robotics solutions** offer significant advantages and are increasingly adopted with proven benefits for workforce optimisation. Multifunctional and fully automated robots offer consistent performance as well as manpower saving.
- Our waste management solution, **Smart Bins**, makes use of sensors and integrated technology to maximise rubbish bin capacity and enhance waste collection efficiency and safety. Tailored for waste bin management for public and private facilities with heavy human traffic, the technology-driven solution can reduce the frequency of waste collection, thus contributing to easing traffic and mitigating road-side emissions.

Solutions for Cyber Security

Critical digital materials and data are valuable items that require meticulous safeguarding. Our end-to-end network protection solution extends our security expertise to protect the physical and the virtual environments.

- **Guardforce Real-time Insured Defense (GRID)** offers complete peace of mind by protecting network and network devices with a Unified Threat Management UTM tool. Network security is monitored by a 7x24 network monitoring centre. A Cyber Crisis Expenses Insurance is also included to enhance protection. It is a cost-effective solution for SMEs and does not require significant investment on IT infrastructure.
