Guardforce

PRODUCT PORTFOLIO

SOLUTIONS BEYOND SECURITY

About Guardforce

Guardforce is a leading security service provider in Hong Kong and the Asia Pacific region established since 1977. We are trusted by major banks, retailers and large corporations for one-stop security solutions integrating various security services such as cash-in-transit, cash management solutions, secure courier and storage, security personnel and electronic security. The group has developed a strong reputation for its diversified and reliable security services in Hong Kong, Macau, Thailand, Australia and New Zealand.

Our Electronic Security

Guardforce leverages proven security expertise and state-of-the-art technological devices to build security solutions designed for the specific and progressive needs of different businesses. Tapping the full potential of electronic security devices, Guardforce provides solutions that go beyond basic surveillance and security functions to derive commercial benefits, such as using facial recognition to identify VIPs or blacklisted personnel, allowing salesperson to provide personalised customer service accordingly, or combine CCTV systems with retail analytic technology to map out a full picture of customer flow in retail premises.

The multi-purpose solutions devised by Guardforce will enhance security, operational efficiency as well as deliver market insights, generating long term benefits to our customers.

Content

Access Control	3 - 10
Alarm	11 - 16
CCTV System	17 - 25
Facial Recognition	26 - 28
Retail Analytic Solution	29 - 30
Outdoor Security	31 - 37
Other Products	38 - 40
Application	41 - 44

Access control systems perform authorisation identification, authentication, access approval, and check accountability of entities, by using login credentials including passwords, personal identification numbers (PINs), biometric scans, and physical or electronic keys. A risk assessment should be carried out to identify threats and vulnerabilities specific to your application. The physical environment, your budget and the false acceptance / rejection rate are also key factors to consider.

"

Access Control

Sateon Access Control System

100% Browser-based Access Control
No software installation needed. You can do your work anytime, anywhere

O Features

- 100% browser based
- No need for software installation
- · Perfect for systems of small or large corporations
- · Industry-standard IT architecture
- · Support third-party system integration
- Multiple-language support
- Future-proof with support to popular reader technologies

Incredible user experience

- Print ID badges
- · Management reports
- · Alarm and incident management
- · Graphic maps
- · Video integration
- Visitor management

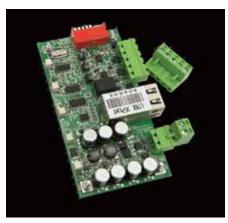

Sateon Access Control System

EZ Intelligent I/O Controllers

- Type IO12 8 + 4 alarm inputs and relay outputs (IP and RS485 versions available)
- Type IO24 8 + 16 alarm inputs and relay outputs (IP version only)
- · Power over ethernet supported
- Panel tamper monitoring
- · Real-time processing at the controller
- · On-board information LEDs
- · Battery back-up
- Up to 4,000 event buffer if off-line
- · No system limit for the number of controllers
- 106mm x 130mm x 38mm (H,W,D) (IO12 board only)
- 106mm x 189mm x 38mm (H,W,D) (IO24 board only)

EZ IP Line Header

- IP to RS485 2-wire Convertor
- Enables routing of RS485 Field Network via a PC network
- 10/100 BASE-T
- DHCP supported
- · Optional 128-bit Rijndael Advanced Encryption Standard
- Power over Ethernet supported
- 32 controller nodes per SATEON Field Network
- 1,200 Mtrs Field Network cable run supported
- · No system limit for the number of IP Line Headers
- 105mm x 72mm x 18mm (H,W,D) (board only)

EZ Door Controllers

- 2 readers with PIN 1 or 2 door configuration
- Up to 65,000 tokens at each controller
- IP and RS485 versions available
- Power over Ethernet (PoE Plus) supported
- · Modern reader technologies supported
- 1 supervised alarm input
- · Panel tamper protection
- · Real-time processing at the controller
- · On-board information LEDs and sounder outputs
- · Individual battery back-up
- · Data configuration retained for up to 100 hrs
- Up to 4,000 event buffer if off-line
- 1A @ 12V DC available per lock output
- No system limit for the number of controllers
- 105mm x 129mm x 37mm (H,W,D) (board only)

ZKAccess 3.5 Access Control

Cost-effective, multi-function, user-friendly access control management solution Ideal for small and medium business applications

O Features

- Easy to configure and use by menu-driven dashboard display
- Secure door management by setting anti-passback and interlocks between doors
- · Real-time monitoring
- · Maps, reports and maintenance are available
- Integrated time attendance and access control application
- Support both standalone devices and control panels (Version 3.5.2.2189 or above)
- Manage up to 100 devices (standalone SDK and PULL SDK)
- · Complete software reporting
- · Supports upload and download by USB flash drive

ZKTeco Access Control Series

FR1200

Compatible with software: ZK Time 5.0 Attendance Management (basic version), ZKTime.net (advance licensed), ZK Access Control Management 3.5

O Features

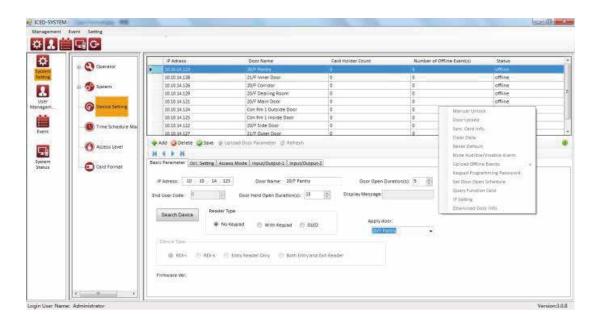

- · Time & attendence record
- · Facial device with access control
- · Full colour touch screen
- Infrared camera
- · Professional facial ID algorithm
- TCP / IP communication
- Stores 800 facial templates / 10,000 RFID cards
- · Reads Facial and / or Pin's and / or RFID card
- 160mm x 104mm x 36mm (92mm with bracket) (H,W,D)

Enhanced Features

- · Audio Visual indications for valid / invalid entries
- Built-in USB port allows for manual data transfer
- Tamper switch
- · Integrated 125kHz RFID proximity reader
- Access Control Relays

- Work with biometric access controllers / standalone mode
- Able to transfer fingerprint samples to access control panel
- All weather conditions including outdoor IP65 protection
- · Mifare card module as an option
- · Built-in alarm buzzer
- 102mm x 50mm x 37mm (H,W,D)

Guardforce ICED Software

Economical access control solution support multi-sites usage Ideal for system upgrade and replacement

• Features

- Support multiple languages
- Provide graphic status of all doors inside the system
- Easy import and export database file via ".xls" file format
- Support multiple operators with individual authority assigned
- · Allow users to manual control the field devices via short menu
- Support different access modes; such as "Card", "Card + PIN", "Number pad only"
- Support multiple "IN/OUT" readers for time attendance
- Optional "First Access" trigger for Time Schedule Unlock function
- · Support multiple card format
- Support Interlock function

Guardforce ICED Access Control

Guardforce Fingerprint Series

Features

Number pad Fingerprint

Network Version

- Can work on Low Frequency reader (125KHz) and Mifare reader (13.56MHz)
- · Can use configuration card to change fingerprint reader to enrollment device
- Finger templates stored in Fingerprint Reader
- · Support 2K users, max. 4K templates, 2 templates for each user
- · Use software to upload and download via RS485
- Fingerprint (FP) / Card + FP / Card + PIN + FP
- · Universal back-plate
- All input and output signals are protected against static charges
- · Reverse power protection
- · All inputs are 12Vdc protected
- 330g / 186mm x 85mm x 22mm (L,W,H) 31.5mm (H) (fingerprint scanner)

Non-Network Version

- · Finger template stored in Mifare Card
- · Fingerprint capacity based on the card capacity
- No synchronisation required
- · Card + FP / Card
- Universal back-plate
- · All input and output signals are protected against static charges
- · Reverse power protection
- · All inputs are 12Vdc protected
- 330g / 186mm x 85mm x 22mm (L,W,H) 31.5mm (H) (fingerprint scanner)

Standard Fingerprint

Guardforce ICED Access Control

Guardiorce

Standard Magic

⊕ Guardforce

Mini Magic

Guardforce Magic Series

O Features

- Available in different technology 125KHz / 13.56MHz
 Mifare / Mifare Plus / DesFire / Legic / CPU
- · Economical Mini Magic can be mullion mount
- OLED Display allow user to see the message clearly under direct sunlight
- Support on-site Reader Configuration Card
- Temper protection
- · Customisation of front-plate and back-lit design
- · Design with end user logo is possible
- · Door Bell function for number pad reader
- · All-weather-proof design with IP65 certificate
- · All input and output signals are protected against static charges
- Reverse power protection
- · All inputs are 12Vdc protected
- · Stanless steel security screw optional
- · Card + PIN operation for Standard Magic
- Standard Magic:
 210g / 115.5mm x 84.5mm x 20.5mm (L,W,H)
- Mini Magic: 160g / 84.05mm x 54.05mm x 16.5mm (L,W,H)

66

Alarm systems serve as a first line of defence against burglary. The features and functions of an alarm system can be tailored to the needs of a business. Fundamentally, the system should be used to monitor areas that may be exposed to unlawful entry. In cases of incidents, the system should send instant alert to the monitoring agents or premises owner. Other factors to consider when deciding on an alarm system are system connection means (wireless or wired), designating a party to respond to the alarm, response timing, budget, contingency plan in case of system failure, risk of false alarm, and using central monitoring centre or a key holder.

"

Alarm

Pacom GMS 4 Burglar Alarm System

A fully-integrated security system, enabling you to effectively handle access control, alarm and video from one central location

Alarm Management

User-friendly system overview
 Status summary presented in user-friendly colour-coded graphic

· Seamless escalation of alarms

Alarms that have not been actioned within a set time can be escalated automatically

Intuitive navigation

Site maps linked to Google Maps simplifies navigation when identifying location of the event

· Reduction of false alarms

Integration with video allows operator to easily retrieve the event's live or recording video

Customised user interface

The operator instruction screen can be customised according to personal preferences

Third-party integration

Monitoring can either be managed by user or outsource to a central alarm monitoring centre, using contact ID protocol

Access Control

· Real-time mustering

Keep track of who is in building during emergency situation

Smart temporary cards

Ensures temporary cards are returned after used

Dynamic security levels

Areas can be set to change security level

Web-based card access management

Issuing card, changing access level and generating reports can be done using web browser

CCTV

- Optional High Level Interface between the DVR / NVR and Pacom Field Controller
- Stream live video to the GMS workstation by clicking an interactive camera icon
- Automatic live and / or recorded video displayed when actioning events enables simple verification and reduction of false alarm call outs
- Easily link cameras to events such as alarm activations and card access transactions

GE Burglar Alarm System

GE NetworX Control Panel NX-8

Multi-function GE NetworX Control Panel support wireless devices

Features

- · All Inputs can be configured as Fire Alarm or Burglar Alarm
- · Maximum 24 system keyboard can be connected
- Expandable to 48 Input Circuits
- Upload / Download system configuration through remote software
- Insertion-type expansion board to utilise the space in controller box
- Capable to connect 2-wire / 4-wire smoke detector
- · The same circuit can be configured to different areas
- 99 nos. of 4-pin code or 66 nos. of 6-pin code
- · Alarm Sounder monitoring circuit
- · Scheduled system On / Off & extendable schedule
- · Telephone line monitoring function
- 185 on-line event includes date, time and event
- Full-scale tamper protection
- 286mm x 286mm x 89mm (W,H,D)

Available keyboard series

LED Keyboard

LCD Keyboard with removable door

Fixed-display Keyboard with removable door

LED Keyboard with removable door

GE Seismic Detector

GE VV600 Series

Designed to detect attempts to break into vaults, safes, night deposit boxes, automatic teller machines (ATM's) and other reinforced physical areas such as data storage and filing cabinets

0

Features

- · Detects all known methods of attacks
- Advanced signal processing differentiates between ambient noise and real attacks
- · Extremely low current draw
- · Two options of testing

- Adjustable sensitivity
- Full-scale tamper protection
- Complete line of accessories
- Easy to install

iHorn Burglar Alarm System

The all-in-one solution synchronises Alarm and DVR recording functions to address security needs. Equipped with real-time remote monitoring and bookmark feature, this solution is an ideal choice for office or home use

LHT300A System

O Features

- All-in-one solution with synchronised Alarm and DVR recording function
- Real-time remote monitoring through the default central alarm monitoring centre or mobile device
- Bookmark feature allows immediate retrieval of the video recording between 10 seconds before and after the incident that triggers the alarm
- · High security with separate recording and alarm functions
- Alarm message includes alarm notification, pre-record video and alarm panel status
- · One-touch online upgrades reduce costs
- · Easy installation by P2P NAT traversal
- · 4 channel video, support two streaming
- · Remote control alarm system, support mobile Apps
- · Temper alarm notification
- · Standby battery supported
- · Real-time voltage monitoring

iHorn Burglar Alarm System

Cost-effective, stable, all-in-one wireless security solution using a series of wireless accessories - suitable for residential and commercial facilities

Wireless Pet Immunity PIR Detector (LH-939BF)

- Transmitting frequency: 433MHz / 868MHz
- Pet Immunity 35KG
- Periodically send online report to control panel (low battery, supervision, anti-tamper, alarm signal)
- White light immunity 10000 Lux
- Auto-temperature compensation, avoiding false alarm
- · Low power consumption, long battery life
- 3*AA Alkaline battery

Wireless Outdoor Siren (HC-105F)

- Transmitting frequency: 433MHz / 868MHz
- · Built-in million encoding
- · Highly water-proof pc housing, UV prevention
- · Sounder 105db at 30cm
- · Sound and flash alarm
- · Back-up battery
- · Rear tamper

Wireless Smoke Detector (SD-007F)

- Transmitting frequency: 433MHz / 868MHz
- · Built-in million encoding
- Periodically send online report to control panel (low battery, supervision, anti-tamper, alarm signal)
- · Manual test function
- · Automatic reset after alarm
- · Easy installation by special base
- Wireless range 100m (no obstacle)
- 9V Alkaline battery

Wireless Magnetic Switch (HO-03W(IV))

- Transmitting frequency: 433MHz / 868MHz
- · Built-in million encoding
- Periodically send online report to control panel (low battery, supervision, anti-tamper, alarm signal)
- 12V Alkaline battery
- Rear tamper

Burglar Alarm Accessories

Guardforce Siren (SS-107)

O Features

- · Self-activated with back-up battery
- · Sound and flash alarm
- Water-proof ABS / AS housing, UV prevention
- Sounder 120db at 100cm
- · LED strobe source
- Triple tamper protection
- Working Voltage: 10V DC 16V DC
- Dimension: 215mm X 285mm X 100 mm (W,L,H)

Choosing the right surveillance system for your business is crucial, not only for security reasons but also for operational benefits as surveillance technology evolves to deliver multi-level functions. When evaluating a system for your business, identify and understand your requirements and needs first. Think whether you want it to be discrete or act as a visual deterrent. Is it used outdoors or indoors, wireless or wired? What is the size of the area to be covered? What solution do you want, in what lighting condition, and is scalability important, do you need VMS analytic function? Remember that regular maintenance is also important to ensure your system is operating at optimal level at all times.

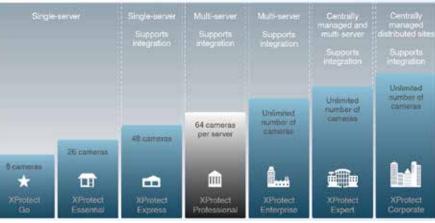

"

CCTV System

Milestone System Xprotect Professional

A scalable, cost-efficient, comprehensive interactive monitoring system for mid-sized installations. Able to support unlimited number of recording servers and cameras

Features

Playback view

XProtect Smart Client is the primary interface for security operators; it provides unique video search tools such as Smart Search and the Sequence Explorer to quickly locate recordings of incidents.

Smart Search lets users search for motion in one or more selected areas of images from a particular camera.

The Sequence Explorer displays a visual overview of captured video and time intervals from one or more cameras as drag-and-throw image thumbnails to help collect evidence quickly.

Map

XProtect Professional features interactive and multi-layered maps displaying the location of every camera in a surveillance installation. Users can see a preview of video from any camera directly in the map.

The Map function improves efficiency in larger surveillance installations by providing instant verification of issues and security breaches, resulting in faster response times.

Mobile Access

XProtect Web Client provides flexible access for users to view, playback and export video from any internet enabled PC.

Milestone Mobile is an application which enables users to view, playback and export video from most mobile devices or tablets.

Video Push enables Milestone Mobile users to turn their mobile devices into portable evidence collectors with video push. Through this function, security staff can stream live events and extend the visibility of central monitoring stations allowing them to act in a more proactive way.

Alarm Manager

The Alarm Manager consolidates all the alarms from a security installation into one video-enabled single point alarm function. It also provides a unified and clear overview of any system-related alarm allowing security operators to prioritise the most critical ones.

All cameras within the area of the triggered alarm will be presented clearly on a map so users can quickly examine the incident and minimise the number of false alarms. The Alarm Manager displays priorities, instructions that need to be followed, alarm statuses and escalation possibilities to optimise the handling of each individual alarm.

Honeywell Network Video Recorder

High-quality image recording with high-level of data protection Ideal for advanced and accurate surveillance

Features

32 CHANNEL NETWORK VIDEO RECORDER

- · Real-time recording: up to 32 channel, Live view: 16 channel
- H.264 high quality decoding
- 1 / 4 / 6 / 8 / 9 / 16 / 32 channel display mode
- · 4 channel simultaneous playback, 30s instant playback
- · Hardware RAID 0, 1, 5, 6, 10 to protect video data
- Up to 32TB storage with SATA interface and e-SATA up to 64TB storage
- Automatic IP search and "One-Click" IP camera import
- · Hot swap technology for quick and easy HDD replacement
- · E-signature (watermark) verification by ONVIF Player
- · Defog function reduces blurring and improves image clarity
- · Electronic Image Stabilizer (EIS)
- · Support ONVIF Profile S, HTTPS

HUS-NVR-6032

64 / 128 CHANNEL NETWORK VIDEO RECORDER

- Maximum 256Mbps incoming bandwidth and 256Mbps outgoing bandwidth
- Up to 64 channel 1080P@ 4Mbps,128 channel 720P@ 2Mbps real-time recording

HonView Touch mobile app

HUS-NVR-7064H-D

HUS-NVR-7128H-D

- Maximum 512Mbps incoming bandwidth and 512Mbps outgoing bandwidth
- Up to 128 channel 1080P@ 4Mbps, 256 channel 720P@ 2Mbps real-time recording

O Features

- H.265 video compression format saves bandwidth and storage
- 24 bay HDDs, up to 144TB storage with SATA interface
- · Hardware RAID 0, 1, 5, 6, 10, to protect video data
- N+1 redundancy to ensure continuous operation
- · Remote viewing via HonView Touch mobile apps
- ONVIF Profile S Conformance
- · Network failure recovery (NFR) function between IP cameras and NVR
- · Automatic IP search and "One-Click" IP camera import
- E-signature (watermark) verification by ONVIF Player
- Redundant power supply
- · Defog function reduces blurring and improves image clarity
- Electronic Image Stabilizer (EIS)
- · Hot swap technology for quick and easy HDD replacement

Expansion array

· Support SAS to expand storage space, up to 144TB

DIGIEVER NVR Total Solution

All-in-one standalone linux-embedded IP Surveillance Solutions Leading-edge solution to satisfy strict requirements and optimise user's experience

DIGIEVER NVR

All-in-one standalone Linux-embedded 4K Hardware Decode Network Video Recorder

- Real-time liveview local display
- · Real-time remote browser monitoring
- · Intuitive multi-channel playback
- · Excellent video recording
- Powerful event and action management
- · Diverse back-up methods
- Superior hardware design
- · Advance and reliable security system

DIGIEVER Extension Solutions
DIGIMobile V2

Monitor everywhere via IOS and Android Mobile system

- Liveview
- Playback
- Direct-control NVR liveview on local display
- · Quick event sorting method
- · Instant event notification
- · Quick monitoring from favorities

DIGIEVER Extension Solutions DIGIARRAY DA-4000E

A storage extension box for DIGIEVER NVR

- Robust scalability up to 24 TB
- Multi-volume storage management
- · Easy expansion via eSATA interface
- Easy deployment with Plug-and-Play design
- Rock-solid hardware RAID

DIGIEVER Extension Solutions Video Wall Decoder VD Series

The World's first Linux embedded wide-range temperature 4K hardware decode video decoder

- · Smart and reliable system
- · Superb liveview video quality
- Compatibility

DIGIEVER Extension Solutions
Mobile NVR

The World's first Linux embedded wide-range temperature 4K hardware decode Mobile NVR

- Excellent display performance
- · Superb hardware design
- High integration ability

DIGIEVER CMS / Video wall CMS-Client / Video Wall Software

Large-scale Central Management Software

- · Intuitive liveview monitoring
- Multi-layer dynamic E-map
- Multi-channel playback
- Flexible system configuration
- · Build Video Wall with CMS Matrix

AXIS Camera Station

O Features

- · Optimised for Axis network video products
- Quick system setup
- · Intuitive operation
- · Effective investigation
- · High-definition identification
- Multi-languages supported
- Up to 60 images per second per camera
- Use local hard drive or high performance
 NAS for storage

Optimised for easy and efficient surveillance
A scalable, powerful monitoring and recording software optimised for
Axis network video products

AXIS Camera Series

AXIS Q6000-E PTZ Dome Network Camera

AXIS M3007-P Network Camera

Features

- Full 360° overview
- 4 x HDTV 720p cameras
- One-Click PTZ control
- · Compatible with any AXIS Q60-E model
- Axis Zipstream technology
- · Ideal for outdoor and wide area surveillance

- · Ultra-discreet design
- HDTV 1080p / 5 MP
- 180° / 360° panoramic view
- Digital PTZ and multi-view streaming with dewarped views
- · Edge storage with support for microSDHC card

Guardforce Series DVR

1080P / 720P AHD DVR

AHD / DVR / NVR 3 IN 1 System Cost efficient and easy management

HYR204P3D9 / HYR208P3D9 / HYR216P31D9 Recording resolution: 1080P HYR104P1D9 / HYR108P1D9 / HYR116P1D9 Recording resolution: 720P

Features

- Support connect to IP camera / Analog camera / AHD camera
- · AHD camera and IP camera recording at the same time
- · Hybrid video recorder, automatic identify AHD or Analog camera
- Support VGA & HDMI 1080P full HD output
- · Support P2P, Mobile phone monitor
- H.264 video compression standard and G.711 audio compression standard
- · Analog video transmission technology via coaxial cable
- · Strong anti-jamming capability, ensure high-definition video transmission display
- Support 20 more languages
- Perfect protection circuit, unique triple watchdog function
- ONVIF common protocol compatible to major brand CCTV Camera

Guardforce Series DVR

AHD / DVR / NVR 3 IN 1 System

Features

- Support AHD-M series front-end un-real time coding and support VGA, HDMI full-HD 1080P output
- Support multi-cloud technology, realised P2P, alarm information send to mobile
- Support mobile surveillance (iPhone, Android Windows Mobile, BlackBerry, Symbian)
- Support 20 more languages
- Support multi-network browser access (I.E., Chrome, Firefox, Safari)
- Thorough protective circuit, particular trebling dongle function, has WEB, SMS, platform, SDK

16 channel DVR

MG-9016DJ Series

Features

- · Remote control through cloud service
- Standard configuration ONVIF, it can support front end IPC connect
- ONVIF protocol, also support ONVIF clients connect
- Support mobile surveillance (iPhone, Android Windows Mobile, BlackBerry, Symbian)
- Support multi-network browser access (I.E., Chrome, Firefox, Safari)
- · Support TV, VGA and HDMI output at the same time
- Perfect protection circuit, unique triple watch-dog function
- Support 20 more languages
- · Flexible display, free replacement boot interface
- Compatibility: the ONVIF protocol compatible with network cameras

8 / 24 channel NVR

MG-NVR8002-2W-CJ / MG-NVR2408-2W-CJ Series

Guardforce Series CCTV Camera

3A200M

Analog HD Camera

30A200M

Cost effective HD cameras with simple installation

O Features

- · Plastic AHD dome camera
- · Analog interface
- · High resolution with 1920 X 1080P
- 24 PCS IR LED, 2.8 -12mm lens, IR distance 30 meters
- Clearer-top photographic device, megapixel resolution
- Good compatibility AHD can access to any brand's back-end equipment
- No need network knowledge, P2P one key to realise remote monitoring
- · Achieve HD and analog display at the same time
- · Low illumination, ICR, DWDR, 3D noise reduction
- 131mm x 93mm(H)

- · Vandal proof AHD Dome Camera
- · Analog interface
- High resolution with 1920 X 1080P
- 24 PCS IR LED, 2.8 -12mm lens, IR distance 30 meters
- Clearer-top photographic device, megapixel resolution
- Good compatibility AHD can access to any brand's back-end equipment
- No need network knowledge, P2P one key to realise remote monitoring
- · Achieve HD and analog display at the same time
- · Low illumination, ICR, DWDR, 3D noise reduction
- 131mm x 93mm(H)

Guardforce Series CCTV Camera

2.0MP HD Network IR Bullet IP Camera

MG -IP200P-R-5-A2M (Manual Focus)

AHD Megapixel HD Analog Camera

1.0 Mega pixel / 1.3 Mega pixel / 2.0 Megapixel

0

Features

- · Manual focus with adjustable focus knob
- Manual zoom lens 2.8mm -12mm
- Use the advanced video compression technology, high compression ratio
- Progressive-scan CMOS, capture images without saw tooth
- · Support automatic B / W, day and night monitoring
- Using LED infrared homogenisation technology, match special IR lens
- · Low current power supply design, IP66 waterproof
- · User management, high system security
- · Built-in WEB browser, support IE access
- IR distance 45-50 meter

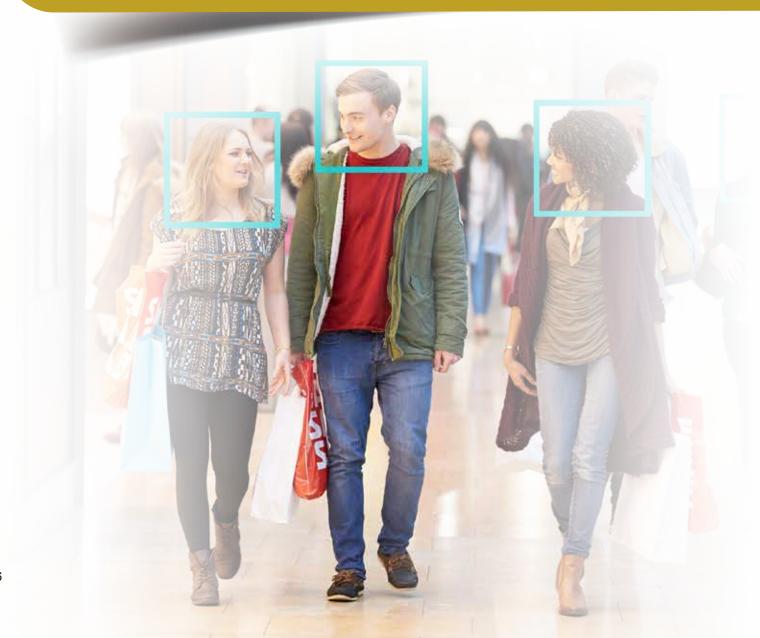

- Clearer visual top photographic device, megapixel resolution
- Good compatibility: AHD can access to any brand's back-end equipment
- No need network knowledge, P2P one key to realise remote monitoring
- Achieve HD & analog display at the same time
- Good night vision: low illumination light sensitive chip
- Long distance transmission: up to 500m, lossless and delay-free

"

Face recognition is one of the least invasive biometrics, since data is captured effortlessly and generally involving no user interaction. Our technology works even with partial occlusions of the face, glasses, scarfs, caps, changes of facial expression, shadows, extreme or poor lighting conditions, or moderately rotated face.

"

Facial Recognition

Herta Facial Recognition

A Multi-function Biometric Solution to identify target subject and restrict access easily, effortlessly, and fast

BioSurveillance

Real-time multiple face recognition

BioSurveillance, detects multiple faces in real-time, facilitates runtime management of alarms and users and incorporates on-the-fly video enrollment.

BioSurveillance NEXT

Recognition up to 150 fps with high resolution IP cameras

A high performance video-surveillance solution for facial recognition, specially designed for the simultaneous identification of subjects in crowded and changeable environments. It works 40 times faster than traditional systems.

- · Analyses multiple cameras simultaneously
- Fully automatic and non-invasive technology
- Works properly on changes of facial expression, illumination, beard, eyeglasses, scarfs and caps
- Subjects can be enrolled from one or more photos or video
- Integration API available
- Perfect solution for crowded environments such as airports, metro stations, shopping malls, stadiums, etc

ID MANAGEMENT (For BioSurveillance NEXT)

- · Automatic subject enrollment function
- Allows for multiple watch lists (blacklists / whitelists)
- Runtime alarm management, highly tuneable
- Compact, flexible system with central multilingual management
- Alarms can be exported to PDF format and visualised on remote mobile devices

BioFinder

A solution that makes it possible to search for a specific subject, using facial recognition, in one or various recorded videos.

Features

- Simultaneous recognition in multiple video recordings
- · GPU technology, at speeds faster than real time
- Intensive, frame by frame analysis, without omissions
- Supports changes in facial expression and illumination, and the presence of glasses, beards, handkerchiefs or hats
- Capacity to enrol subjects through one or various pictures
- · Alarms exportable to PDF format

APPLICATIONS

- · Forensic analysis of video recordings
- Automatic classification of information from recordings
- Searches for suspects in large video databases

Herta Facial Recognition

BioAccess

Face biometrics is used to identify users from access control lists and verify their identity.

- Automatic subject enrollment function
- · Allows for whitelists and blacklists
- Alarms can be exported to PDF format and visualised on remote mobile devices (Android, Apple)
- Compact & flexible system with central multilingual management
- Completely automatic technology
- Works properly on changes of facial expression, illumination, beard, glasses, scarves and caps
- Subjects can be enrolled from one or more photos
- Maximum efficiency when trained with several photos or videos
- · Users cannot be impersonated using photographs
- · Integration API available
- Perfect solution to control the access of users to physical locations such as buildings, offices, data centres or restricted security areas in general

BioMarketing

With facial analysis technology it is possible to learn more about your customers and classify individuals based on their physical appearance and then use that information in interactive, targeted marketing.

O Features

- Extraction of features and multiple face detection in real-time
- · Image, video, or live capture
- Automatic and non-invasive technology
- Multiple user characteristics (age range, gender, ethnicity, use of glasses, facial expression)
- · Integration API available

APPLICATIONS

- · Segmentation of objective target
- · Smart selection of advertisements
- · Adaptation of content to the audience
- · Permanent acquisition of customer statistics

With the simple click of a button, our Retail Analytic Solution lets you understand how customers experience your stores. Powerful reports, dashboards, and data visualisation offer new insights into the shopping journey and unprecedented visual access to your business.

Retail Analytic Solution

Retail Analytic Solution

Transform real-world patterns and trends into powerful and easy-to-understand reports and visual summaries

Visitor Analysis

People Counting

- Total number of people within a timeframe
- · Works for multiple access

Path Map

- · Understand where customers go
- Validate assumptions and recognise patterns

Heat Map

· Identify popular zones in a store

Store Analysis

A / B Testing

· Compare result of different display

Zone Monitoring

- No. of people enter the zone
- · No. of people staying on average
- Average no. of people on the zone per hour

Product Analysis

Product Popularity

- Understand which products are picked up the most
- Compare product interactions across multiple display

Operation Management

Multi-store view

- · Search by product category
- Compare traffic of different store
- · Conduct store audit

Mutliple Access

- Store monitoring
- Cross-store traffic comparison
- Manpower relocation
- · Opening hours monitoring
- · Stock delivery status

Zone Monitoring

- · Monitor key service areas
- Optimise staff placement
- Predict customer trend

Real time remote access

Insights and reports

- Access insights anytime, anywhere
- · Reports are available
- · User-friendly visual insight

Highly secure, sensitive and reliable outdoor security is critical for the prevention of crime for large complexes and it is the first line of protection.

Our state-of-the-art outdoor security solutions are able to provide all-round solutions to defend, deter, deny and detect potential crimes.

Outdoor Security

AFSCO Electric Fence

Low-cost solution to fend off high-cost crime

Features

- Repelled by releasing a short, sharp, regulated, safe but painful electric shock
- · Alarms generated on detection of attempts to load, cut and short-circuit or tamper
- Compliant with national and international safety and security standard including BSEN 60335 upon completion of installation
- Quality assured, systems are only provided through accredited dealer network
- Controller with open system architecture for easy interface to other security systems on full remote monitoring and controlling

Application

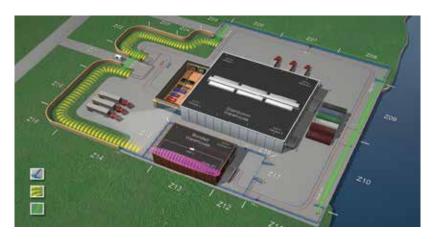

Southwest Microwave

Integrated perimeter security solutions to prevent unauthorised access, vandalism, theft or harm to critical infrastructure and property

Fence Detection System

Revolutionary fence-mounted smart sensors that pinpoint cut or climb intrusion attempts to within 3m (10 ft) and eliminate environmental nuisance alarm problems.

INTREPID MicroPoint

New-generation MicroPointTM fence detection, featuring open-architecture communications protocol for networking with other INTREPIDTM Series II technologies.

MICRONET

A solution for correctional facilities featuring simplified administration tools and heavy-duty hardware for maximum tamper-resistance.

INTREPID MicroPoint Cable

Unique cut / climb detection technology featuring precise disturbance location, resistance to nuisance alarms, uniform detection sensitivity and software-controlled zoning.

MicroPoint Tape

Ruggedised perimeter fence solution for barbed tape applications.

Southwest Microwave

Alarm Monitoring and Control System

Advanced security management systems that monitor, display and control a facility's complete perimeter security program.

INTREPID SINGLE-PLATFORM SYSTEM CONTROLLERS

Scalable, open-architecture security management and networking solutions for new-generation INTREPID $^{\text{TM}}$ systems, offering the utmost in flexibility for diverse site parameters.

INTREPID MAP MONITOR / ADVANCED MAP MONITOR

Graphical user interface with integrated alarm, event and device management plus complete reporting capabilities.

PERIMETER SECURITY MANAGER

The ultimate in device integration and ease of use for centralised perimeter security control across single or multiple locations.

MICRONET PREMIUM PERIMETER MONITOR

Simplified yet full-featured GUI-based perimeter security management system for correctional applications.

Microwave Sensors

Short or long range volumetric microwave links and transceivers for the detection of intruders at fencelines, in open areas, at gates and entryways and for rooftop and wall applications.

INTREPID Microwave 330 DIGITAL MICROWAVE LINK

K-Band detection to 457m (1500 ft) / 244m (800 ft) (CE). Open-architecture networking with other INTREPID™ Series II technologies.

MODEL 300B MULTIPLE RANGE MICROWAVE LINK

X-Band detection to 183m (600 ft). Short range pattern for gate protection. Extended range patterns for full perimeter protection.

Southwest Microwave

Microwave Sensors

MODEL 310B-33456
EXPLOSIONPROOF MICROWAVE LINK

K-Band detection to 100m (328 ft). Reliable intrusion detection in the presence of ammable or combustible materials.

MODEL 310B LONG RANGE MICROWAVE LINK

K-Band detection to 457m (1500 ft). Narrow beam width for operation at long ranges and within narrow corridors.

MODEL 380
MICROWAVE TRANSCEIVER

K-Band detection to 61m (200 ft). Continuously variable range cutoff prevents alarms from targets beyond a specified range.

MODEL 320SL DUAL SYNCHRONIZED MICROWAVE LINK

X and K-Band detection to 183m (600 ft). Maximumsecurity stacked sensor configuration for the highest risk applications.

MODEL 316 LONG RANGE MICROWAVE LINK

K-Band detection to 244m (800 ft). Narrow beam width for operation at long ranges and within narrow corridors.

MODEL 385
MICROWAVE TRANSCEIVER

K-Band detection to 122m (400 ft). Continuously variable range cutoff prevents alarms from targets beyond a specified range.

Relocatable Microwave Sensors

Rapid deployment short or long range microwave sensors for the protection of VIPs, mobile assets or other temporary high security applications.

316 RDS
RAPID DEPLOYMENT SENSOR (LINK)

K-Band detection to 244m (800 ft) – CE Certified. Narrow beam width for operation at long ranges and within narrow corridors.

385 RDS
RAPID DEPLOYMENT SENSOR (TRANSCEIVER)

K-Band detection to 122m (400 ft). Continuously variable range cutoff prevents alarms from moving targets beyond a specified range.

Infrared and Dual Technology Sensors

Advanced, stand-alone high-performance sensors for short and medium range outdoor intrusion detection applications.

MODEL 415 PASSIVE INFRARED INTRUSION SENSOR

Digital signal processing, adaptive threshold decoding and signal shape analysis ensure reliability in varying conditions. 107m (350 ft) range.

MODEL 460B ACTIVE INFRARED INTRUSION SENSOR

6-beam outdoor active infrared sensor with a protection zone of up to 100m (328 ft) for gates, narrow corridors or applications with aesthetic concerns.

MODEL 455B ACTIVE INFRARED INTRUSION SENSOR

Quad-beam sensor with 50m (165 ft) range designed for gate protection or walltop applications.

MS15 / MS16 DUAL TECHNOLOGY MOTION SENSOR

Designed to detect upright / walking and running targets. MS16 offers enhanced detection capability for prone crawling targets.

Buried Cable Detection System

Terrain following, volumetric smart sensors that pinpoint intrusion attempts to within 3m (10 ft) for applications where covert protection and site aesthetics are essential.

INTREPID MicroTrack II

New-generation MicroTrack buried cable detection, featuring open-architecture communications protocol for networking with other INTREPID $^{\text{TM}}$ Series II technologies.

INTREPID MicroTrack

Unique buried cable detection technology featuring precise disturbance location, resistance to nuisance alarms, uniform detection sensitivity and software-controlled zoning.

VIP Protection

Other than standard security system, additional products are also available to extend protection valuable assets at home or in offices or retail outlets, such as secure vault set up and building, PBA system, digital locks, bullet-proof glasses and other security devices. Please consult our security advisor for more details.

"

Other Products

Safe

Robust safes from reputable Chubb brand keep your valuable assets safe

0

Features

- Tested and approved by ECB-S to security level S2 in accordance with EN 14450
- With an effective body and barrier thickness of 65mm
- Door is constructed from a 10mm steel plate with additional protection over the locking cover.
 A Fire Resistance material is incorporated at the back panel of the door
- Boltwork with New "Anti Heeling" feature, which provides stronger bolts protection and more resistant of buckling under prying attack
- Offers 30 minutes fire resistance protection for documents. Tested in accordance with Japanese fire test J.I.S S1037
- Bigger and bolder hinge to provide better protection
- · High Security Mauer double bitted key lock with non-key retaining function
- Comes standard with an appealing King Cobra fascia panel
- Fitted with S&G Three Wheel KCL combination lock, highly recognised and reputable in the world

Chubb Safe King Cobra

0

Features

- The body has a total barrier thickness of 68mm
- Chubb Torch and Drill Resisting barrier. The T.D.R. is 51mm thick and provide high level of protection against oxy-acetylene attack
- The door has an overall thickness of 190mm and a total barrier thickness of 73mm
- The lock and boltwork are enclosed by a hinged lock case cover secured by two Chubb locks
- The door is secured by 38mm diameter moving bolts which extend from all four sides of the door
- Optional fittings Heavy duty shelves / lockable cupboards / lockable drawers / deposit traps (only size 3420 and above)
- The Trident is for secure base fixing
- Attractive warm light grey spatter finish to suit any environment. The handle, trimplate and key hole cover are a warm dark grey

The Chubb Trident

0

Features

- High quality cash safe protecting cash within an office environment with a high level of security of Grade 3 & 5
- The Europa range is tested to ECB.S and conforming to EN1143-1
- Passive and active relockers are incorporated into the boltwork to resist attack
- Chubbsafes special barrier material is applied in the construction of the safe to protect against various kinds of burglary attack
- Each safe can be equipped with high quality fittings to maximise storage requirements
- The Europa can be customised with a choice of locking options, deposits, shelves and lockable drawer deposits in order to meet customer requirements

Europa

Anti-theft Devices

Non-intrusive anti-theft devices to prevent loss in your retail outlets

InvisiGate Series

Crystal Gate Series

0

Features

- Invisible Aetanna concealed under floor slap
- Maintain good store outlook
- · Cause no disruption to store traffic

- Slim line crystal design
- Compatible with all 58kHz labels and hard tags
- Self-contained electronic board for easy installation
- · Multiple pedestal and installation options
- Software-controlled with USB cable connection to PC or laptop

Building a total security solution with the right devices is very important, yet challenging. The factors to consider include site environment, desired security level, user's expectations and budget. The ultimate goal is to ensure the setup is able to defend, deter, deny and detect potential crimes, and ensure the premises is well protected from any break-ins.

Examples of security devices for different applications in different settings are listed here for reference. Consult our security advisor for recommendations when designing your total security solution.
